# 252.0 Release Notes

17 October 2026

# Contents

**Enhancements**

- App Configuration: Left Menu Navigation
- Shibumi AI: Chat Window UI Update

**Issue Resolutions**

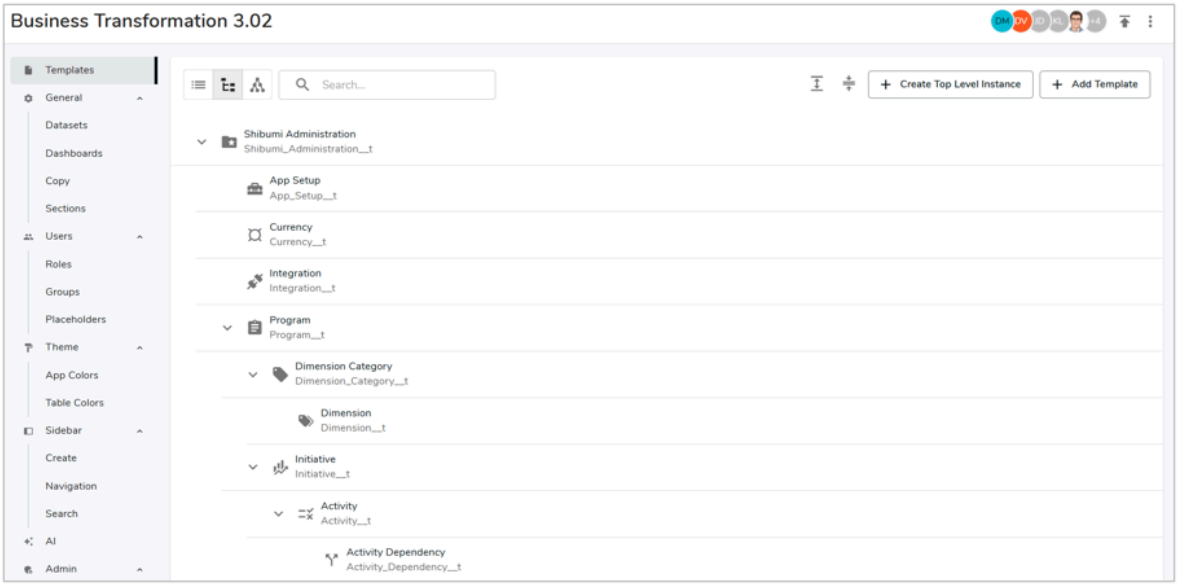

- Registration links not being sent to users via password reset link if invited environment doesn't match domain environment
- Bulk Create association dropdown shows the breadcrumb even if "Show Name Only" is selected
- Collaborator icons overlap with other components on Dashboards
- Dashboard export doesn't work in Chrome when App Name has special characters

For Shibumi Customer and Partner Use Only.

# App Configuration: Left Menu Navigation

**Summary**

- Previously, App configuration was organized across a horizontal tab structure at the top of the App Summary page.
- As platform capabilities continued to grow, the horizontal tab structure became crowded.
- Now, Release 252.0 redesigns App configuration navigation from a horizontal tab structure into an organized left menu with clearly defined subcategories. Related settings are grouped together in a way that reflects how admins think and work through configuration, making it faster to find, navigate, and act on the settings relevant to their role. As always, each admin will only see the sections they have access to based on their role.

**Applicable to**

- App Admin, Operations Admin

**Set up**

- No setup required.

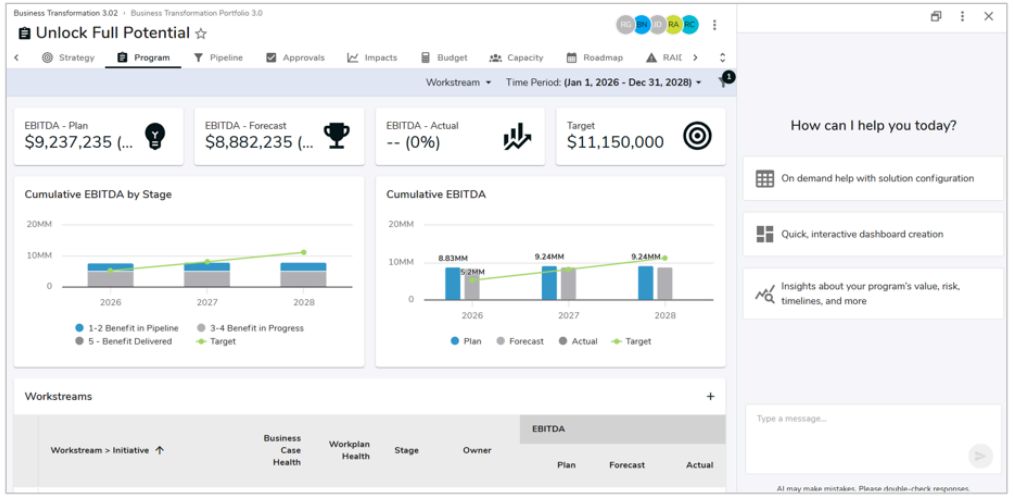

For Shibumi Customer and Partner Use Only.

# Shibumi AI: Chat Window UI Update

## Summary

- Previously, the Shibumi AI Chat Window opened as a floating panel that users could move and resize. While functional, the Chat Window and the solution content competed for the same screen space, requiring users to minimize and maximize the panel to see what was behind it when acting on AI recommendations.
- As the AI Chat Window became a more central part of how users interact with their program data, the experience of moving between AI recommendations and platform content needed to become more seamless.
- Now, Release 252.0 delivers a polished visual refresh to the AI Chat Window alongside the very practical ability to dock the Chat Window to the right side of the page. When docked, the Shibumi platform automatically resizes to accommodate the Chat Window, keeping both fully visible and usable at the same time.

## Set up

- No setup required.

## Applicable to

- Shibumi AI Chat Window

For Shibumi Customer and Partner Use Only.
